To Whom It May Concern:

2nd African PACS & RIS Edu-Conference: October 2012

It gives us great pleasure to endorse the above PACS & RIS Edu-Conference, the second of its kind to be held in Africa. This congress will serve to improve understanding and increase knowledge of this dynamic development in medical imaging, which is currently revolutionising the way in which medical facilities operate.

PACS & RIS has dramatically changed and improved the service that can be offered by Radiology facilities. This is to a great extent due to the vision and planning that goes into defining requirements, as well as to effective project management to make the implementation of PACS & RIS a success in such a challenging and complex environment.

This Edu-Conference will serve to share experiences and to learn from fellow professionals across all spectrums to ensure that it becomes possible for all centres to work together and to successfully navigate the way to optimized PACS & RIS implementation.

We hereby confirm our full support for this event and trust that it will unite professionals as they strive towards the common goal of providing an efficient and highly skilled medical service in the modern technological era.

Yours truly,

CléRoux

Mrs Carol Le Roux

[Senior Lecturer: Radiography: Cape Peninsula University of Technology]
